Customer Journey Map

Persona: Celia Márquez, 74, retired, Temuco

Scenario: book a doctor's appointment online this week, with help from a club volunteer and without handing over her passwords

STAGE	1 Awareness	2 Consideration	3 Decision	4 Delivery & Use	5 Loyalty & Advocacy
Customer Activities	• Realizes she must book a doctor's appointment online this week • Hears about To the Digital Side at her senior club	• Asks club peers whether the service can be trusted • Checks that facilitators and volunteers are verified and part of a known network	• Creates her profile with help from the club • Sets the errand she needs and when she is available	• Describes the errand and accepts the matched facilitator or volunteer • Meets them, types her own passwords and completes the errand	• Checks the status of the errand in her log • Requests help for the next errand and tells her club peers about it
Customer Goals	• Know that help exists to do online errands without depending on her family	• Confirm that the service and the people are trustworthy • Keep control of her passwords	• Sign up without hassle • Make clear which errand she needs and when she can	• Complete the errand with company, by herself • Be reassured that it is done	• Know that the errand was resolved • Be able to ask for help again and feel more independent
Touchpoints	• Senior citizens' club • Municipal talks • Family	• Club facilitators and volunteers • Word of mouth • Verified facilitator or volunteer profile	• App link shared by the club • Short sign-up form • Municipal coordinator	• Matching and scheduling screen • Meeting place • Reminder of the time and place	• Errand log • Recorded confirmation • Senior citizens' club (word of mouth)
Experience (emotions)	Worried	Hesitant	Uneasy	Confident and proud	Calm and relieved
Pains	• Doesn't want to bother her children each time • Fears missing the appointment window	• Afraid of giving passwords to a stranger • Unsure who is safe to ask	• Small text and long forms • Too many steps before getting any help	• Waiting for a match • Unclear time or place of the meeting	• Not sure the errand was really completed • Forgets what was done last time
Solutions in To the Digital Side	• Clear message at clubs: help beside you, never your passwords	• Verified profiles • Limited, known support network • Visible rule: passwords are never shared	• Large text and three short steps • The municipal coordinator can help with sign-up	• Matching and scheduling on one screen • Guided in-person help while she types her own passwords	• Errand log with recorded confirmations • Status visible in one tap
Business Goal	• Make the service known in senior clubs and the municipality	• Build trust in the service and its verified facilitators and volunteers	• Get the older adult to sign up and request their first help	• Errands are completed with support and recorded	• People come back and recommend the service, and the volunteer network stays active
KPIs	• People reached at clubs and municipal talks	• Older adults who look into the service • Verified facilitators and volunteers	• Completed sign-ups • Help requests created	• Errands resolved out of requests • Time between request and meeting	• People who ask for a second errand • Reported satisfaction
Organisational Activities	• Present the service at clubs and municipal talks	• Verify facilitators and volunteers • Define the support network (clubs and municipality)	• Support sign-up from the municipal coordination • Keep the register of older adults, facilitators and volunteers	• Match the request with an available volunteer • Coordinate the meeting and record the outcome	• Track errand status on a dashboard • Obtain statistics on the help provided
Responsible	• Municipal coordination • Senior citizens' clubs	• Municipal coordination • Club facilitators	• Municipal coordinator • Facilitator or volunteer	• Facilitator or volunteer • Older adult (types her own passwords)	• Municipal coordination • Service team
Technology Systems	• App link • Informational material at clubs	• Verified profiles of facilitators and volunteers	• Registration with a verified profile • Help request • Simple, accessible interface	• Matching • Integrated scheduling (date, time and place) • Traceability log	• Traceability log with confirmations • Tracking dashboard and statistics for the coordination
